

AESTHETICAL AND DENTAL TRAINING: FACIAL REJUVENATION

May 26th and 27th 2023

FACIAL REJUVENATION

Speaker

Dr.
Paola Pederzoli
M.D. M.Sc.

Born 26TH JANUARY 1962
MIRANDOLA (MODENA) ITALY

First Degree in Medicine and Surgery at Modena University.
Second Degree in Dentistry and Dental Prosthesis at Modena and Reggio Emilia University.
Third degree in Aesthetic Medicine at a Post-University Center in Ambulatory Medicine in Bologna.

Masters in Aesthetics: Facial imperfections – Botulinum Toxin usage – Carboxytherapy in Aesthetics – Chemical Peelings – Timed- surgery – Skin Check-up and analysis – Face and neck medical and surgical therapy – Biostimulation: strategies in the treatment of facial imperfections – Filler: Implanting techniques with microcannulas – Venous insufficiency: US-guided varicose vein sclerotherapy – Mesotherapy and micro-therapy – Analgesic Mesotherapy – Intra-lipotherapy: non surgical liposuction through phosphatidylcholine injections – Diet therapy on obese – Nutritional Supplements – Clinical and Instrumental Symptomatology and body composition analysis Body reshaping: through liposculpture and lipofilling – Laser Techniques

She's leading Training Course in Aesthetic Medicine in Europe, China, Saudi Arabia and USA.

At present she works as Physician in General Medicine and Aesthetic, and as a Dentist in her Clinic in Mirandola, Modena, Italy.

FACIAL REJUVENATION

Abstract

Our **2-day Concentrated Grow Factors (CGF)** training teaches medical professionals how to inject client's own Concentrated Grow Factors to grow new collagen, regenerate soft tissue and smooth and tighten skin. This course is taught by top medical aesthetics professionals, dental surgeons and biochemical scientist, each with **in-depth cosmetic injection and molecular biology experience.**

This procedure has universal applications throughout the medical and dental fields. This course reviews the science and biology behind autologous blood concentrates in order for clinicians to understand how the process works as well as the indications for proper use.

Why CGF?

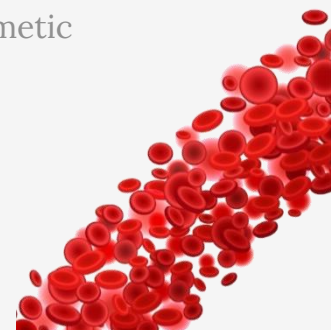

CGF has a long history of use in sports and orthopaedic medicine as well as dentistry and reconstructive surgery. We're now seeing that it can also significantly benefit cosmetic facial rejuvenation, dermatology and skin wound healing.

How Can CGF be Used to Rejuvenate Skin?

When injected into the skin, CGF grows new collagen and newer studies show that it can also soften sun damage while smoothing and tightening skin. It is an effective treatment in correcting common age-related skin concerns such as dark circles and hollows under the eyes, fine lines, sagging, decreased firmness and uneven tone.

A clinical use of this procedure will be discussed during the course, with applications

on patients with injection treatments and cosmetic applications for skin rejuvenation.

FACIAL REJUVENATION

Course objectives

The main course's objective:

- ✓ Fundamental knowledge of the wound healing process.
- ✓ Learn about the medical history of CGF use and how it's now being used in cosmetic medicine.
- ✓ Education on how CGF can be used to generate soft tissue and collagen, while also firming and improving skin tone.
- ✓ Protocol for drawing blood, placing it in the centrifuge and separating its different components.
- ✓ Activation of CGF with ozone.
- ✓ Knowledge of proper placement of CGF for optimal results.
- ✓ Client preparation, pre and post care instructions and safety protocols.
- ✓ Clinical hands-on training for real world experience on venipuncture: CGF injections and use of these growth factors for facial rejuvenation.

This evidence-based course allows for you to understand and fully integrate this popular procedure with your practice and indications:

- ✓ Aesthetic indications
- ✓ Facial Area (upper and lower)
- ✓ Neck Areas
- ✓ Décolleté
- ✓ Hands
- ✓ Alopecia Treatments
- ✓ Male and Female Pattern Baldness
- ✓ Combination Therapies including micro needling, cannula, melatonin, ozone, vitamin D and post treatment options
- ✓ Preparation of personalized mask and cream using own patients CGF

FACIAL REJUVENATION

CGF Aesthetic Agenda

May, 26th 2023

15:00 Venue and Registration

15:30

1. CGF The Next Generation of Platelet Rich Plasma.

- ✓ CGF: Definition and Preparation Considerations.
- ✓ Clinical validity of CGF.
- ✓ Physician Accreditation.
- ✓ Indications & Contraindications.
- ✓ Protocols, Technique and Safety Recommendations.

2. Lecture: Aesthetic applications for CGF for face, neck and hands.

- ✓ Anatomy of the skin and lips.
- ✓ Preparing the skin for injectable.
- ✓ Different techniques of injecting for facial rejuvenation.
- ✓ L.P.C.G.F., I.C.F., A.P.A.G., BIOFILLER and their Applications in Bio-stimulation, Volumizing effect, Redefine the facial contour.
- ✓ Aesthetic of the perioral area- Lip augmentation. Combining growth factors with melatonin, vitamin D and medical needling and cosmeceutical skin care to get the best results. GREEN CREAM and GREEN MASK with C.F.G., Alopecia treatments.

18:30 End of Work

20:30 Welcome Dinner

FACIAL REJUVENATION

CGF Aesthetic Agenda

May, 27th 2023

9:00 Start

3. Practical Session, Venipuncture, Blood drawing, Biomaterial Preparations

- ✓ C.G.F.
- ✓ A.P.A.G.
- ✓ Gel
- ✓ LPCGF
- ✓ ICF

4. Practical Session in small groups with volunteer patients.

- ✓ Participants will have the opportunity to give CGF injection for aesthetic applications and alopecia.
- ✓ I.C.F. for the reduction of periocular black halos.
- ✓ APAG for volumizing effects.
- ✓ BIOFILLER.

12:30-13:30 Lunch Break

5. Practical Session continuation.

6. Discussion on the importance of the Regenerative Medicine.

17:00 End of Training

FACIAL REJUVENATION

Training Basis

The aim of the course is when you go back to your clinic you may begin carrying out the preparation and implementation of the Plasma Gel, CD34+ cells and Concentrated Growth Factors with confidence and thus make a difference.

This is a very practical course where you go from theory to practice under the supervision of the expert.

You may acquire the security and confidence to start incorporating this treatment in your daily practice.

Practices are held on real patients.

Description: An intensive course that offers a practical approach to facial rejuvenation, facial profiling, dark circles, nasolabial folds, hair loss treatment (androgenic and areata alopecia), infiltration with CGF + Melatonin. Preparation of the patients and the skin before being infiltrated. Introduction to the use of Vitamin D in the aesthetic and immunological fields.

Date:

May 26th and 27th 2023

Location:

Medimpeks d.o.o. Headquarter,
Vrtojbenska cesta 19a 5290 Šempeter pri Gorici, Slovenija

Participants:

Max 10

Registration Fee:

Including meals and breaks
